vintage industrial

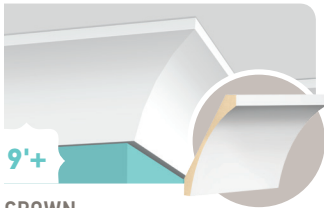

The moulding profiles in this combination are sized to balance the overall height of a room. High ceiling profiles are perfect for higher, more dramatic ceilings and walls typically found on the main floor or main living areas of the home. Standard profiles should be used with smaller rooms with ceilings that are lower than 9 ft.

Indicates profiles designed for ceiling heights over 9 ft.

recommended interior doors

Thick, solid doors with square and rectangular lines provide the ideal Vintage Industrial transitional element. Use sliding hardware to complete the industrial theme.
